I, John V. Forcier, attorney of record in the above-identified pending patent application, U.S. Serial No. 10/022,114, state that I am a representative authorized to sign on behalf of Massachusetts Institute of Technology ("MIT"), identified below as the owner of the entire right, title, and interest in and to the above-identified patent application. I have reviewed all the evidentiary documents accompanying or referred to in the instant Terminal Disclaimer and certify that, to the best of my knowledge and belief, title to the above-identified application is in the name of MIT.

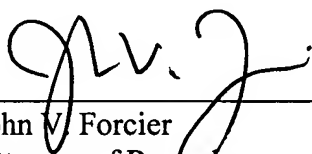

MIT of 77 Massachusetts Avenue, Cambridge, Massachusetts 02139 is the owner of the entire right, title, and interest in and to U.S. Patent No. 6,405,158 and is owner of the entire right, title, and interest in and to the above-identified patent application, 10/022,114, by virtue of the Assignment recorded in the United States Patent and Trademark Office at Reel 8011, Frame 0821, on December 27, 1993, by the inventors in this application to MIT.

MIT hereby waives and disclaims the terminal part of any patent granted on the above-identified application that would extend beyond the full statutory term of U.S. Patent No. 6,405,158, issued June 11, 2002, and hereby agrees that any patent so granted on U.S. Serial No. 10/022,114 shall be enforceable only for and during such period that the legal title to said patent shall be the same as the legal title to U.S. Patent No. 6,405,158. This agreement to run with any patent granted on the above-identified application, U.S. Serial No. 10/022,114, and to be binding upon MIT, its successors or assigns.

MIT does not disclaim any terminal part of the term of patent granted on the above-identified application, U.S. Serial No. 10/022,114 prior to the expiration date of the full statutory term of U.S. Patent No. 6,405,158, in the event that any said patent expires for failure to pay a maintenance fee, is held unenforceable, is found invalid, is statutorily disclaimed in whole, or terminally disclaimed under 37 C.F.R. 1.321(a), has all claims canceled by a re-examination certificate, or is otherwise terminated prior to expiration of its statutory term as presently shortened by any terminal disclaimer, if any, except for the separation of legal title stated above.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements are made in the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
